This listing presents the papers in alphabetical order of the first author. The author index that follows covers APPLIED PHYSICS A and B, and is presented in tabular form. The names are listed in alphabetical order in the first column. The second column gives the first author of the respective paper, and the third column the bibliographic data necessary to locate the paper. The issue is specified by the number separated from the volume number by a slash The fourth column states the major PACS number so that the topic of the paper can be inferred by consulting the PACS listing on the left page.
